

Akande Ezra

Frontend Engineer | Visual Director
akandeezra240@gmail.com | 09131496781 | [LinkedIn Profile](#)

Professional Summary

Versatile Frontend Engineer and Visual Director with a technical foundation in Next.js, React, and Tailwind CSS. Proven track record in building complex, user-centric web applications and delivering high-quality visual media. Specialist in the integration of AI and Blockchain for advanced healthcare research applications.

Technical Skills

Frontend: JavaScript (ES6+), TypeScript, React, Next.js (App Router), Tailwind CSS.

Media Production: Cinematography, Advanced Video Editing, Color Grading, Photography.

Creative Suite: Adobe Premiere Pro, Lightroom, Photoshop.

Hardware/Tools: Egripment crane operation, Blackmagic URSA Mini systems.

Experience

Lead Frontend Developer & Technical Lead | 2025–Present

- Directed technical team workflows, meeting coordination, and documentation for project stakeholders.
- Managed end-to-end development lifecycles for complex, role-based dashboard applications using Next.js and Tailwind CSS.

Visual Director & Media Producer | 2024–Present

- Executed professional cinematography and post-production workflows for community and commercial projects.
- Operated advanced production hardware, including Egripment cranes and Blackmagic URSA Mini cameras.
- Produced comprehensive media assets, including voiceover scripting and presentation design for large-scale events.

Key Projects

AI-Blockchain Healthcare Framework | System Architecture & Lead Developer

- Architected a hybrid system for secure medical symptom analysis using AI-driven diagnostics integrated with Blockchain for data integrity.
- Designed the end-to-end data acquisition flow and cryptographic verification processes for sensitive research data.

CampusStay Hostel Hub | Frontend Architect

- Engineered a multi-role web platform supporting unique dashboards for students, agents, and administrators.
- Implemented a scalable frontend architecture focusing on state management and role-based access control.

NASA Mission Telemetry Dashboard | Lead Designer/Engineer

- Engineered a real-time telemetry application utilizing NASA API integration and JPL Horizons ephemeris data.
- Designed interactive 3D mission stages and data visualization modules for live space mission tracking.

Education

Ladoke Akintola University of Technology | B.Tech in Computer Science | 2026

- Final Year Project: Developed a hybrid AI-Blockchain framework for secure medical symptom analysis and data integrity in healthcare research.
